

MELANIE TRONCOSO GALINDO

Software Engineering Student · Queretaro, Mexico

+52 56 6297 4468 · melanie.troncosoga@gmail.com · Portfolio: melanietroncoso.dev

ABOUT

Bilingual software engineering student (B2+ English, ELET certified 2026) with hands-on experience building and deploying full-stack web applications. Delivered a real client project integrating Firebase as a backend to handle dynamic real-time data, independently and from scratch. Interested in software development internships where I can apply skills in HTML, CSS, JavaScript, and C while growing toward AI/ML and mobile development.

EXPERIENCE

Freelance Web Developer | Client Project — Auto Detailing Business · 2026

- Built and deployed a full-stack website for a real paying client, delivering complete review functionality by integrating Google Firebase Realtime Database as the backend, reducing client dependence on third-party review platforms.
- Designed and implemented a dynamic customer review system, enabling real-time submission and display without page reloads, using HTML, CSS, and JavaScript on the frontend.
- Managed the full project lifecycle independently, from client requirements gathering to final deployment.

Teleperformance | Customer Service Representative · Sep 2024 – Nov 2024

- Resolved customer inquiries for multiple U.S. banking clients in a high-volume English-language environment by navigating CRM and account management systems simultaneously.
- Completed structured onboarding program, adapting to complex financial service workflows within the first two weeks of deployment.

PROJECTS

SMV Auto Detailing Website | HTML · CSS · JavaScript · Firebase · 2026

- Sole developer on a live client website featuring real-time review submission and persistent storage via Firebase Realtime Database — a full-stack solution built without frameworks.

[Click here to check it out.](#)

LYNX — UVM Academic App Simulator | HTML · CSS · JavaScript · UI/UX Design · 2026

- Co-developed a web-based simulator replicating a full university mobile app for UVM, consolidating schedules, grades, payments, and academic advising into a single intuitive interface — as part of a 4-person team.
- Led the frontend development and UI design of the simulator, building all screens and navigation flows in HTML, CSS, and JavaScript from scratch.
- Designed and presented the full project pitch deck, applying Lean Six Sigma-aligned systems thinking to document problem definition, objectives, user flows, and improvement proposals.

Personal Portfolio Website | HTML · CSS · JavaScript · 2026 ·

- Built a personal portfolio from scratch in HTML to showcase projects and technical skills — self-directed, designed and coded independently. [Click here to check it out.](#)

SKILLS

Languages: JavaScript, HTML, CSS, C (proficient) · C++ (learning)

Backend & Tools: Firebase Realtime Database, Git, GitHub, Microsoft Office Suite

Concepts: Algorithms & Data Structures, Computational Logic, Responsive Design, UI/UX Design

Methodologies: Lean Six Sigma White Belt

Spoken Languages: Spanish (native) · English B2+ (ELET certified, 80/100)

CERTIFICATIONS

English Language B2+ — ELET — Universal Kvalitet Services (UKS) · Score: 80/100 · Jun 2026 · Valid until Jun 2027

Lean Six Sigma White Belt — International Lean Six Sigma Group · Jun 2026

EDUCATION

Universidad del Valle de Mexico (UVM)

B.Eng. Software Systems Engineering · 2026 – Present

Relevant coursework: Computational Logic, Algorithms, Software Development Fundamentals, Systems Thinking
